Russell Hatton, Chair
Westtown Township Planning Commission
1039 Wilmington Pike
West Chester, PA 19382

Re: Conditional Use - Traffic Review
Robinson Tract (aka Crebilly Farms) Development
Westtown Township, Chester County

Mr. Hatton:

As requested, a technical review of the following materials has been completed relative to the Westtown Township Zoning Ordinance as well as reasonable and customary standards of Traffic Engineering practice:

- Roundabout Exhibit (unattributed, dated June 8, 2020)
- Concept Plan, S-ALTPLAN 12 (prepared by ESE Consultants, dated June 5, 2020)
- West Pleasant Grove Road Traffic Calming Exhibit (unattributed, dated May 13, 2020)
- Transportation Impact Study for the Robinson Tract (prepared by McMahon Associates, dated August 13, 2019, revised May 15, 2020)
- Conceptual Design Exhibit for Wilmington Pike (SR 0202) and Skiles Blvd/Stetson Drive (prepared by McMahon Associates, last revised May 15, 2020)
- Conceptual Design Exhibit for Street Road (SR 0926) and New Street (prepared by McMahon Associates, last revised May 18, 2020)
- Widening Plan for West Pleasant Grove Road (prepared by ESE Consultants, dated May 15, 2020)
- Conceptual Design Exhibit for West Pleasant Grove Mini-Roundabout (prepared by McMahon Associates, last revised May 13, 2020)
- West Pleasant Grove Road Traffic Calming Exhibit (unattributed, dated May 13, 2020)

Please note that this review should be considered preliminary and subject to change based on the submission of revised materials to address the comments presented herein.

ALBERT FEDERICO CONSULTING, LLC

The following comments are offered for the Township's consideration:

1. *In consideration of conditional use approval, the Township may require the applicant to submit a development impact study which considers the impact of the proposed flexible development on traffic volume and safety. {§170-906.D(2)}*

- a. As previously noted, to allow for consideration of the impact of the proposed development the Transportation Impact Study (TIS) should be revised to address the following:

- i. Table 1 should be updated to identify West Pleasant Grove Road as a Township Collector Roadway. *{Westtown Township Comprehensive Plan Update, page 9-7}*.

Status: This comment remains outstanding. Westtown Township identifies West Pleasant Grove as a Collector Road and the Study should be revised accordingly.

- ii. The sections of the TIS discussing improvements should note that the internal Collector Road provides access to the property.

Status: The Study has been revised to address this comment.

- iii. As previously noted, the scope of physical improvements required to provide acceptable sight distance to public roads should be clearly indicated on the plans.

Status: This comment remains outstanding. The limits of clearing and/or other improvements required to provide adequate sight distance should be illustrated on the plans to allow the Planning Commission to consider potential impacts. Further, it does not appear that the analyses have been updated to consider required roadway widening.

- iv. As previously noted, Cost Estimates for necessary improvements to accommodate future traffic should be provided. *{§149-804.A(10)}*

Status: This comment remains outstanding. The Applicant has previously indicated that this information will be provided once there is "concurrence" regarding the scope of improvements.

- v. As previously noted, an Implementation Strategy for necessary improvements to accommodate future traffic should be provided. *{§149-804.A(11)}*

Status: This comment remains outstanding. The Applicant has previously indicated that this information will be provided once there is "concurrence" regarding the scope of improvements.

ALBERT FEDERICO CONSULTING, LLC

- b. The following comments address new materials presented in the May 15, 2020 Study:
- i. References to Proposed Access Road names should be for consistency with the Alternative Plan submitted to the Township for consideration.
 - ii. Pending resolution of the following technical comments below, conclusions regarding project traffic impacts to the intersection of PA Route 926 and New Street remains outstanding:
 - (1) Verify the capacity analysis inputs for PA Route 926 and New Street, including detector settings and arrival type, to ensure the accuracy of the counter-intuitive results. Of particular note, the average delay for westbound vehicles making left turn and through movements are projected to decrease from 9.9 seconds/vehicle to 0.9 seconds per vehicle, even though the lane group volume increases from 377 vehicles (including right turns) to 406 vehicles per hour (excluding right turns). This improvement in operations appears disproportionate to the additional green time associated with the 49 vehicles assumed to be diverted from the southbound approach.
 - (2) The future coordination presented for PA Route 926 appears unlikely to be approved by PennDOT. Written confirmation from PennDOT should be provided that the New Street and Connector Road intersections will operate at different cycles lengths than US 202 (90 versus 120 seconds) and not be coordinated with US 202. If confirmation cannot be provided an alternative analysis utilizing a consistent cycle length and coordination with US 202 should be provided.
2. *The burden of proof shall be upon the applicant to prove to the satisfaction of the Board of Supervisors, by credible evidence, that the use will not result in or substantially add to a significant traffic hazard or significant traffic congestion. The peak traffic generated by the development shall be accommodated in a safe and efficient manner. Such analysis shall consider any improvements to streets that the applicant is committed to complete or fund. {§170-2009.D(1)(h)}*
- a. As previously noted,
 - i. The Applicant has indicated that turn lanes will be provided to accommodate post development volumes at the following intersections, but these improvements are not reflected on the submitted plans:
 - (1) PA Route 926 at New Street
 - (2) US Route 202 at Pleasant Grove Road
- Status: Supplemental exhibits for the improvement of PA Route 926 and New Street have been provided to the Township and PennDOT. US Route 202 and West Pleasant Grove Road remains outstanding.**

ALBERT FEDERICO CONSULTING, LLC

- ii. Additional grading and/or traffic management measures appear warranted to enhance safety at the three accesses proposed to have insufficient sight distance or the exact minimum distance (without considering required roadway widening):

- (1) Collector Road at PA Route 926
- (2) Road N (previously M) at West Pleasant Grove Road
- (3) Collector Road at West Pleasant Grove Road

Status: (1) To date the limits of disturbance associated with the Collector Road and PA Route 926 have not been provided. (2) Based on discussions at the Planning Commission Road N may be recommended for Emergency Access only. (3) A separate exhibit (dated June 8, 2020) has been provided for a full roundabout at the Collector Road and West Pleasant Grove Road. Based on the information provided there appear to be very limited impacts to Primary (Steep Slopes) and Secondary resources. These impacts may be further minimized through coordination with the Westminster Presbyterian Church.

- iii. The design of the internal Collector Road should incorporate suitable traffic calming measures to maintain a 35 mile per hour average travel speed.

Status: This comment remains outstanding. The Applicant has previously requested to defer this until land development.

- iv. The following internal roadways should be reconfigured to remove geometric irregularities.

Status: The Concept Plan exhibit (dated June 5, 2020) addresses these items.

- v. Additional facilities should be provided to address non-vehicular connectivity, including:

- (1) A perimeter trail around the portion of the site west of the internal Collector Road. {*Westtown Township Comprehensive Plan Update, page 9-15*}
- (2) Connections to existing and planned facilities along Dunvegan Road and within the Arborview neighborhood. {*Westtown Township Comprehensive Plan Update, page 9-15*}
- (3) Sidewalks along proposed roads, including accessible crossings. {*§149-916*}
- (4) Connectivity to pedestrian attractors, including Stetson Middle School, Westminster Presbyterian Church, and the existing retail uses at US Route 202 and PA Route 926. {*§149-916*}

Status: The Concept Plan exhibit (dated June 5, 2020) substantially addresses these items.

ALBERT FEDERICO CONSULTING, LLC

- vi. Provisions should be made for future access from the Westminster Presbyterian Church to the internal Collector Road.

Status: This comment remains outstanding. It is noted that the connection should be at a mutually agreed upon location. Based on preliminary conversations with the church it's understood that a connection to the southern parking area may be considered preferable.

- vii. Provisions should be made for School Bus Stops, including short-term parking for drop-off and pick-up.

Status: This comment remains outstanding.

- b. The following comments address supplemental materials submitted to the Township:

- i. The conclusion that the project does not adversely impact the intersection of PA Route 926 and New Street is based in part on an assumed corridor coordination which appears unlikely to be approved by PennDOT. As noted above, additional supporting information and analyses should be provided.
- ii. It is anticipated that School Buses and other large vehicles will use the intersection of the Collector Road and West Pleasant Grove Road. As such a full roundabout is considered preferable to a min-roundabout where vehicles may transverse the central island.

Based on the preceding, the Applicant has not demonstrated compliance with the condition use criteria in §170-2009.D(1)(h): *In consideration of conditional use approval, the Township may require the applicant to submit a development impact study which considers the impact of the proposed flexible development on traffic volume and safety.*

Please do not hesitate to contact me at 610.608.4336 or albert@federico-consulting.com should you have any questions or require additional information.

The Concept Plan exhibit (dated June 5, 2020) addresses these items. Sincerely,

Albert Federico, P.E., PTOE
