

Reference: Westtown School

Dear Michael Rufo,

Thank you for the opportunity to discuss the Westtown School Scoreboard Project. Please see below a response to the questions regarding our traditional scoreboard products.

Daktronics cannot accurately measure a digit with a light meter because no 2 points across the face of a scoreboard will give you the same measurement. The scoreboard adheres to the maximum luminance standard and does not surpass 2000 CD/M2 for offsite viewing.

Also, I would like to point out that our scoreboards are dimmed manually through user input at the console.

If you need additional information, please do not hesitate to reach out to me.

Enthusiastically,

A handwritten signature in black ink, appearing to read 'JJ Godri', with a stylized flourish at the end.
