AN EXELON COMPANY

01/02/2024

Dear Customer:

Every day, PECO is delivering innovation and advancing smart energy to provide safe, reliable, affordable, and clean energy and energy services for our customers. As part of our work, we will be upgrading and installing new equipment to enhance the local electric distribution system in your area.

This project is part of PECO's System 2020 plan to invest an additional \$274 million during the next five years to install advanced equipment and reinforce the electric system, making it more weather resistant and less vulnerable to storm damage. This investment is in addition to \$900 million in ongoing system work completed each year, including replacing and upgrading equipment.

About the Project:

- More than \$300,000.00 will be invested to enhance the local electric distribution system for you and your neighbors in Westtown Township.
- We will be upgrading and installing new equipment in your area, including new utility poles, transformers, fuses and wire.
- This project also will include additional tree trimming and tree removals to reduce the number of outages caused by trees and other vegetation. This process will begin in February 2024 with construction to follow right after.
- The majority of this work will occur along Cheyney Dr and its rear property.
- PECO's work will occur from 8 a.m. to 4 p.m., and should be completed same day.
- The project is expected to be completed by the end of April 2024 and work will be performed by PECO crews or qualified PECO contractors.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned outages which should not occur until January 2024. We will work closely with local officials to minimize the impact on customers as much as possible.

We are dedicated to keeping you informed about our work, listening to your input and modifying plans based on your feedback when possible. If you have any questions about this work during construction, please contact Kipling Joseph at Kipling.Joseph@exeloncorp.com.

Sincerely,

Courtney Allen
Director, Regional Electrical Operations
